

Sharing Server Views

Easily share your Tableau Server views with others using the Share options. Clicking the Share button generates simple links that you can either embed in another blog or webpage or email to a friend or co-worker.

1 Open the Share Options

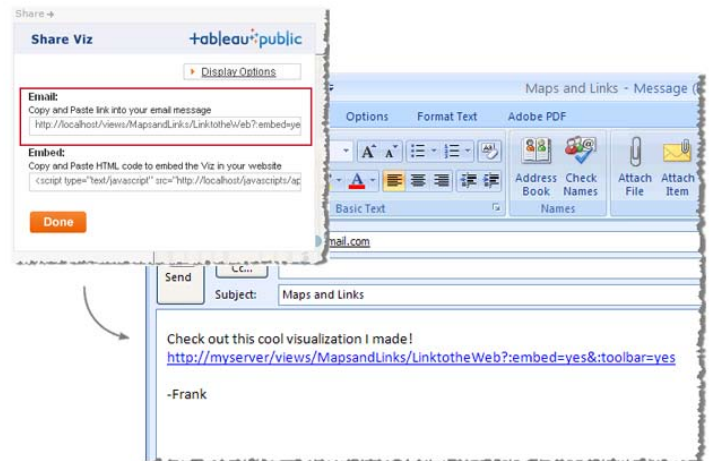

Click the **Share** link in the upper left corner of the view.

The Share link may be below the view if it is embedded in a webpage or you are logged in as a guest user.

2 Email the Viz

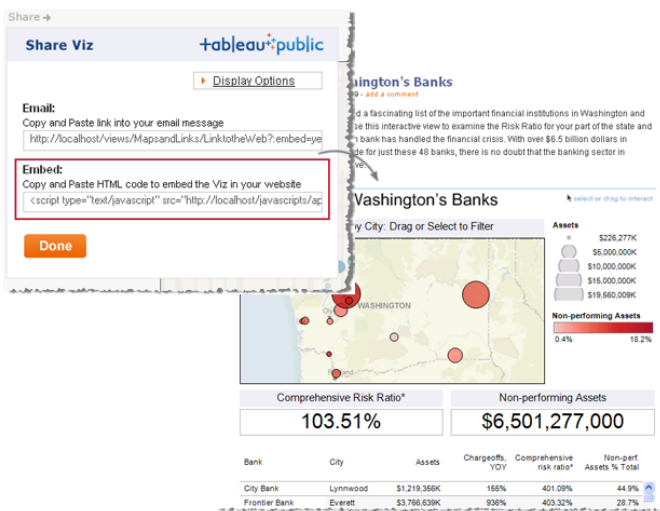

Copy the URL from the first text box and paste it into an email to a friend or co-worker.

Make sure that the people you are sharing with have access to the server and the right permissions to see the view.

3 Embed the Viz

Copy the HTML code from the second text box and paste it into your blog or webpage. The interactive view will display inline on the page.

4 Optionally Adjust How it Displays

Click the **Display Options** link in the upper right corner of the Share window to adjust how the view is displayed. For example, you can change the width, height, and whether to show the toolbar.
